TH04 Colour Touch Screen Thermostat

A more cost effective choice for home and commercial users who do not require the higher end functionality of the TH05 model.

TH05 WiFi 5th Generation Touch Screen Thermostat

Our exclusive top of the range heating thermostat with all our energy saving, connectivity and device control features. Suitable for home and commercial use.

The new Warmfloor TH05 Thermostat is perfect for both commercial and residential installations. It can be controlled remotely through our TH05 App, or multiple units can be controlled from a central location using our built-in hard-wired option.
